Israel Arvizu

(714)-804-6052   Orange County, CA   israelarvizuofficial@gmail.com   israelarvizu.com   LinkedIn   Github

SKILLS

Languages: JavaScript, Python, HTML5, CSS, SQL
Frameworks/Tools: React, Redux, Git, Postgres, SQlAlchemy, Sequelize, Node.js, Flask, Express.JS, Docker, AWS, WSL
Core Skills: OOPrograming, ORM techniques, UI/UX Design, Biliterate (Spanish), Collaboration & Communication

PROJECTS

InstaFlick | *(React/Redux, JS, Python, Flask, SQLAlchemy, AWS S3, Docker)*   **live| github**
- Constructed a clone of Instagram with features to post, delete, comment, and search for users designed practically pixel-perfect to Instgram.com's user interface.
- Constructed RESTFUL API endpoints to produce a more easily understandable API. For example, users are able to look up accounts by searching instaflick.com/bradpitt, instaflick.com/taylorswift, etc.
- Streamline the process of uploading & storing photos to reduce the server load by implementing AWS S3 buckets.

HipResort | *(React/Redux, JS, Express.JS, Sequelize)*   **link | github**
- HipResort allows users to browse available resorts, create/delete mock reservations, and create/ update/delete resorts in real-time, all designed with a modern UI for a better user experience.
- Implemented a custom search component that sends a fetch request to the backend making a custom Sequelize query and retrieving the filtered information to the user.
- The app is constructed leveraging Redux and React to give users faster response times seamlessly by utilizing the DOM virtual state.

AlphaHood | *(React/Redux, JS, Python, Flask, SQLAlchemy, YFinance, Docker)*   **live | github**
- A website designed with inspiration from Robinhood that allows users to essentially have the same functionality such as trading & browsing stocks with mock currency, making watchlists, and checking their portfolios.
- Utilizes Flask with SQLAlchemy as an ORM in our DB to make storing data efficiently with minimal response times.
- Incorporated YFinance API to receive real-time stock market data to simulate the environment as if it was a live trading site such as Robinhood.

EXPERIENCE

Bank Teller
Wells Fargo & Co   Sept 2021 - February 2022
- Provide excellent service in finances and customer service.
- Work with management to improve customer service, teamwork, and problem-solving
- Determine each customer's banking needs by asking pertinent questions and carefully listening for any cues.
- Efficient use of personal computer applications and the adaptation of new required software.
- Carefully analyze customers' accounts for any warnings or essential knowledge.

CEO/Founder
Swifty Gadgets LLC   April 2020 - Current
- Run and manage all tasks while keeping track of all finances and investments within the company.
