Core Skills: OOPrograming, ORM techniques, UI/UX Design, Biliterate (Spanish), Collaboration & Communication

PROJECTS

InstaFlick | *(React/Redux, JS, Python, Flask, SQLAlchemy, AWS S3, Docker)*   **live**| **github**
- Constructed a similar clone of Instagram with the features to post, delete, comment, and search users.
- Implemented a custom search component using redux.
- Streamline the process of uploading photos to reduce the server load by implementing AWS S3 buckets.

HipResort | *(React/Redux, JS, Express.JS, Sequelize)*   **link** | **github**
- An app that allows users to make & delete mock reservations to resorts and designed with a modern UI for a better user experience.
- Constructed RESTFUL API endpoints to build a more easily understandable API.
- Designed an app that gives users faster response times by leveraging Redux.

AlphaHood | *(React/Redux, JS, Python, Flask, SQLAlchemy, YFinance, Docker)*   **live** | **github**
- A website designed with inspiration from Robinhood that allows users to essentially have the same functionality such as trading & browsing stocks with mock currency, making watchlist, and checking their portfolios.
- Utilizes Flask and a SQL database to make storing data efficient.
- Incorporated YFinance API to receive real-time stock market data to set the app environment as if it was a live trading site such as Robinhood.
